## Word of the Day – **Chitchat**

### Transcript

Hi everyone. Today's word of the day is **chitchat**. **Chitchat** is simply to chat and talk in a friendly manner. But it's also a bit more than that. It's usually to talk about small and trivial things, having light conversation like, "How's the weather?" or "Did you hear about the baseball scores?" So it's talking about light things, things that don't really have any heavy importance on any matter. Or it's typically associated with gossip. This is also known as just making small talk. So here are two examples,

First, **"Serena indulges in chitchat every now and then with other ladies even though she knows it is useless to talk about other's lives."**

And second, **"I don't have time to chitchat about who's dating who after class with my colleagues. I need to focus on my studies and issues that really matter."**

So in this case chitchat is just having small trivial conversation but it's also typically associated with women more than men but I don't know why that is so I hope you can use the word **chitchat** in your everyday lives. Thank you for listening to Practicast. You can find the script at [Practicus.co.kr](http://Practicus.co.kr). Thank you and have a good day.
