## Word of the Day – **Plight**

### Transcript

Hi everyone. Today's word of the day is **plight**. So when I hear the word **plight** I think of a socially large scale or maybe an area wide issue that's a bad condition, an incident or situation that puts many people at risk or in danger. And here's an example,

**"The plight of the Jews goes back centuries from the Christian Crusades to the Holocaust and the ever-present wars that continue to exist in the Middle East."**

And here's another example, **"The small town worries that the less media coverage there is the more they worry that their plight of combating toxic pollution would be forgotten and cause the oil companies to back down on their verbal commitments to clean up their factories."**

So I hope you can use the word **plight** to describe a large scale condition or incident of people or a community in your everyday lives. Thank you for listening to Practicast. You can find the script at [Practicus.co.kr](http://Practicus.co.kr). Thank you and have a good day.
