

Word of the Day – **Comprehensive**

Transcript

Hi everyone. Today's word of the day is **comprehensive**. **Comprehensive** is having extensive knowledge of something or analyzing something completely. It's covering a large scope of usually knowledge. And I have two examples. First,

"The comprehensive examination covered everything from state history to world economics. It was no wonder I was exhausted after completing the marathon."

So this exam was **comprehensive**. It covered a large scope of information. Second, I can use the word **comprehensive** to describe the way analysis or an investigation is done.

"After a brief investigation of the car accident, the police decided that further analysis needed to be done. After six months they completed a comprehensive analysis and discovered that someone tampered with the victim's car brakes and that it was really no accident at all."

So in this way they did a brief investigation but later did a **comprehensive** analysis. So I hope you can use the word **comprehensive maybe** to describe your exams, to describe analysis or research. And thank you for listening to Practicast. You can find the script at Practicus.co.kr. Thank you and have a good day.
