Summary

People’s awareness about the environment has been ever increasing. Especially noticeable now is the effort to reduce plastic waste. Recently, we hear numerous news reports about plastic waste hurting the ecosystem, especially in the ocean. One unforgettable picture was **that of a tortoise bleeding due to a plastic straw stuck in its nose**. There was also a report that more than a hundred plastic cups were found inside the body of a dead whale. These are the examples that show **how much of a threat the disposable products that humans choose for their convenience can be for the environment**.

In tandem with the people’s awareness about the environment, one of the most popular coffee chains in Korea decided to completely get rid of plastic straws in their stores. Instead, they use straws made of paper. Also, college students are **staging a campaign to use travel mugs on campus** instead of single-use cups. People shopping at grocery stores are encouraged to use re-usable bags rather than choosing **disposable plastic bags**.

Considering the enormous amount of garbage thrown away every day by the world’s population, my single effort to reduce garbage may look meaningless. But if **the single effort is multiplied by millions**, this will lead to positive effects for the environment.

해석

1. People’s awareness about the environment 대중의 환경에 대한 의식
2. Especially noticeable now is ~ 특히 ~이 두드러진다
3. that of a tortoise bleeding due to a plastic straw stuck in its nose 코에 박힌 플라스틱 빨대 때문에 피를 흘리는 거북이의 사진
4. how much of a threat the disposable products that humans choose for their convenience can be for the environment 인간이 편하려고 선택한 일회용 플라스틱 제품이 얼마나 환경에 위협이 될 수 있는지
5. In tandem with the people’s awareness 대중의 의식에 맞춰
6. staging a campaign to use travel mugs on campus 학내에서 텀블러를 쓰자는 캠페인을 벌이다
7. disposable plastic bags 일회용 비닐 봉지
8. the single effort is multiplied by millions 한 사람의 노력이 수백만 배가 된다면

Keywords / Key Sentences
