Summary

In 2016, Korea **lost its long-enjoyed position** of the world's fifth largest automobile manufacturer. And its **total amount of automobile exports shrank 3%** last year. However, **amid gloomy news reports about Korea's auto industry**, the total export of sports utility vehicles or SUVs went up 10% in 2018. The rise is mainly due to the increasing popularity of SUVs worldwide. It's not just the international market. The total number of SUVs sold in the Korean market in 2018 **passed the 500,000 mark for the first time**. As more Koreans are interested in outdoor activities and camping, more drivers, in their 20s to 50s, are choosing SUVs over sedans. **Technological advancement is also a factor. Many convenient features of sedans are now installed in SUVs**, which make driving easier and more comfortable.

SUVs used to have **an image of a huge gas guzzler that leaves a large carbon footprint**. But they are now available in various sizes: compact, mid size and full size. It's not just the size. Various types of hybrid SUVs are **waiting for environmentally friendly drivers in the market**.

With many convenient features and wider options to choose from, the popularity of SUVs doesn't seem to change for the time being, globally and domestically.

해석

- lost its long-enjoyed position 오래도록 누려 온 지위를 상실했다
- total amount of automobile exports shrank 3% 자동차 수출 대수가 3% 감소했다
- amid gloomy news reports about Korea's auto industry 한국 자동차 산업에 대한 부정적인 뉴스 가운데서도
- passed the 500,000 mark for the first time 처음으로 5십만 대를 넘었다
- Technological advancement is also a factor 기술 진보도 또 하나의 요인이다
- Many convenient features of sedans are now installed in SUVs 세단의 여러 편의 기능들이 SUV에도 장착되었다
- an image of a huge gas guzzler that leaves a large carbon footprint 큰 탄소 발자국을 남기는, 기름을 많이 먹는 자동차라는 이미지 / 환경을 오염시키고 기름만 많이 먹는 차라는 이미지
- waiting for environmentally friendly drivers in the market 환경을 생각하는 운전자들의 구매를 기다리고 있다
