Q: Why do Koreans let motorcycles drive on the sidewalk?

A:

1. The government should crack down on these motorized scooters. It really threatens the safety of pedestrians. Driving a motorcycle on the sidewalk should be banned in any circumstances, and the violators should pay the consequences, including paying a fine.
  
2. It is definitely wrong for motorcycles to drive on the sidewalk. But we need to consider the urban environment of Korea. Koreans use a wide range of delivery services, and we all want the delivery to be done very quickly. That's part of the reason those delivery men on motorcycles drive on the sidewalk. They need to be on time. Quick delivery service is convenient, but the people using these services are partly to blame for the traffic violations.
  
3. I see some scooters driving on the sidewalk, but most motorcyclists follow rules. We shouldn't criticize all the motorcycle drivers who are mostly delivering something under pressure to be on time. As time goes on, through law enforcement's crackdown and increased public awareness, the issue should be resolved.
